Klopotek Analytics for CRR

CRR

Klopotek STREAM

Customize our many report templates for crucial areas by drag & drop

Klopotek Analytics is our powerful reporting and business intelligence solution that specifically addresses the needs of publishers for flexible reporting and analysis in their daily business. The solution is built on top of Pentaho, a leading BI and data integration platform owned by Hitachi Data Systems.

Klopotek Analytics for CRR takes our CRR reporting to another dimension

In the area of Contracts, Rights, and Royalties (CRR), Klopotek Analytics provides over 36 pre-defined report templates. The underlying comprehensive data sources allow flexible adjustment of the reports or individual reporting. Data can be real-time or updated on a regular basis depending on your specific needs. The reports are available in multiple languages.
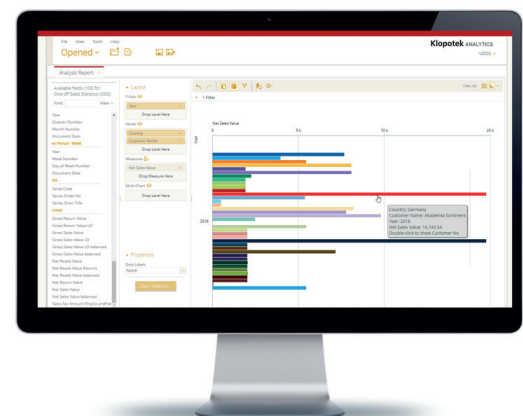

Adjusting or building your reports is easy

In comparison to traditional ways of creating reports, Administrators and Power Us-

ers at a publisher can easily tailor the report templates provided by us to their specific needs by adding and removing filters and attributes using drag & drop functionality. The underlying data sources cover common attributes in a specific reporting context:

- **Klopotek CRR – Acquisition Contract**
- **Klopotek CRR – Royalties**
- **Klopotek CRR – Royalty Calculation Error**
- **Klopotek CRR – Sub Rights Accounting**
- **Klopotek ERP – Change Log**
- **Klopotek OOS – One-Off Sales Statistics**

Behind the data sources, a new data warehouse was built for optimal performance on reporting while also real-time data sources are available depending on the intended purpose.

So what type of standard reports are available?

There are numerous standard reports available to you now within each of the above areas.

Acquisition Contracts

Manage your Acquisition Contract process. There are many Contract and Advance Management reports. Some examples are what contracts exist with Fixed Term Duration, Unpaid Advance reports and Key Delivery and Publication Timeline reports, etc.

Easy building and adjusting of your CRR reports

Royalties

Handling your Royalties business is split into:

- **General Reporting** – where you can find the Royalty Balance report, Authors Ledger, etc.

- **Royalty Error Lists** – these reports are linked the Royalty Calculation. Explore your royalty error messages with the 'Klopotek CRR – Royalty Errors' data source. There are attributes for the dimensions 'Contract', 'Account', and 'Product'. Select from these templates:

- Royalty Calculation errors by Royalty Calculation Process ID
- Royalty Calculation errors by a specific Contract Number
- Royalty Calculation errors by a specific Account Number
- Royalty Calculation errors by Lead Publisher which allows you to distribute any errors easily to a specific Publisher team to deal with and correct

The data sources given here are connected to your productive environment in real time.

Royalties – the data source 'Klopotek CRR – Royalties' supports the dimensions 'Contract', 'Account', 'Document', and 'Product' with the most relevant attributes for interactive reporting.

The templates you can choose from are:

- Royalty Posting List Summary
- Royalty Posting List by Account
- Royalty Posting List by Document Number

The data sources listed here are connected to your productive environment in real time.

Sub Rights Accounting

This is where you can find a number of Financial reports for managing your rights income. This includes reports showing the Rights Contracts Signature Status, Rights Income received, and Unallocated Rights.

Change bank account details / Modification History Reporting

You can report on your change protocol entries using 'Klopotek ERP – Change Log'.

This interactive data source provides the most relevant attributes for the dimensions 'Change' and "Business Partner'.

The template 'Changes in Bank Details' can be used, so it is easy to search for changes in an IBAN or SWIFT code and see the date this information has been modified, by whom, using which application etc. This is very helpful for audit and control purposes.
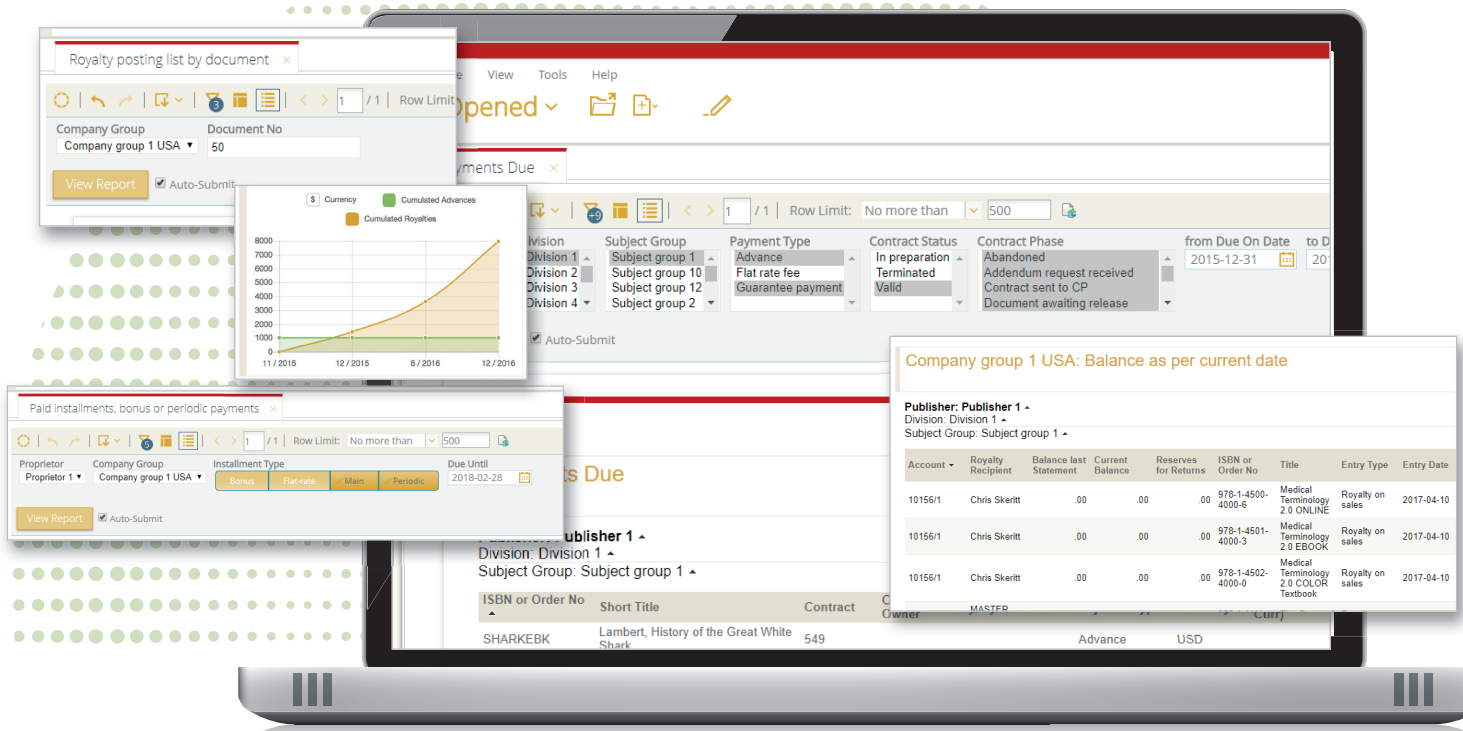

The data sources given here are connected to your productive environment in real time.

Sales Reporting

You can also choose from Sales reports with Royalty implications. Examples are the Non Royalty Report (which reports on products which have been allocated a classification of Non royalty and therefore are not expected to be linked to an Author Contract) or Sales Reports by Product.

Reporting in these areas is significantly easier in comparison to the related options available in the Classic Line.

Do it your way …

Publishers are not limited to the report templates provided by Klopotek: they can build their own reports, if desired, based on the data sources available in our Klopotek Analytics for CRR bundle. Premium Users of Klopotek Analytics can also create their own data sources.

The next version of this bundle will contain more data sources and over 50 templates. It will also feature options for interactive reporting in the area of Royalty Statement Printing.
